INTERVIEW SUMMARY AND RESPONSE TO EXAMINERS AMENDMENT

On June 17, 2005, Examiner Noori contacted Applicants' representatives by telephone to discuss amending claim 28 to clearly distinguish from a hypothetical calculator membrane. Without acceding to the merits of this potential rejection, and only to further the prosecution of the above-identified application, Applicants submitted an amended version of claim 28 to the Examiner by email on June 20, 2005 (copy attached). On June 21, 2005, the Examiner again contacted Applicants' representatives to suggest minor alterations to the amended version of claim 28, as set forth in the Examiner's Amendment. Applicants' representatives agreed to these changes.

Applicants would like to thank Examiner Noori for initiating the telephonic interview to place this application in condition for allowance. However, Applicants reserve the right to file one or more continuation applications directed to the subject matter of original claim 28. Claim 28 was amended solely to further this application. Applicants still believe that claim 28 is patentable over the art of record and the hypothetical calculator membrane rejection.
